Volume 22 Author and Subject Index

A

absolute error, 307
adaptive testing, 259, 271, 292, 387
aggregation, 368
Ankenmann, R. D., 170
answer copying, 144
appropriateness measurement, 53
Armstrong, R. D., 237
automated item selection, 3
automated test assembly, 224
automated test assembly using passages, 237

B

Baker, F. B., 89, 153
Baydoun, R., 71
Berger, M. P. F., 248
bias, 375
BILOG, 131, 153
Book Reviews, 85, 89, 387
bootstrap, 369
bootstrapping, 394
Brandt, C. J., 368
Brennan, R. L., 307

C

Cai, L., 394
certification testing, 237
cheating, 144
classical test theory, 212, 375
Clauser, B. E., 357
coefficient α, 170, 269, 369, 375
Cohen, A. S., 116, 131, 144, 345
comparing dependent correlations, 93
composite reliability, 369, 375
composite score, 179
Computer Program Exchange, 52, 70, 84, 93, 391, 392, 393, 394
computerized adaptive testing, 259, 271, 292, 387
computerized testing, 224
computerized tests, 71
concurrent calibration, 131
confidence interval for composite reliability, 369
congeneric model, 179
congeneric tests, 71
constrained adaptive testing, 259
continuous response model, 333
continuous testing, 271
Correction, 368
correlations, comparing dependent, 93
cross-level analysis, 368

D

DEPCORR, 93
dichotomous responses, 248
differential item functioning, 33, 345, 357, 391
differential weighting, 179
dimensionality, 99
Donoghue, J. R., 33
double monotonicity, 3

E

EM algorithm, 333
equating, 116, 131, 153
equivalence, 71
essential unidimensionality, 3
estimation error, 333
exploratory factor analysis, 375
EZDIF, 391

F

factor analysis, 99
Feldt, L. S., 170

G

generalizability theory, 307
Gibbs sampling, 153
Gierl, M. J., 387
graded response model, 116, 345
graded unfolding model, 70
greedy algorithms, 212
GUMJL, 70

©1998 Sage Publications, Inc.

H
Hambleton, R. K., 357
Hittner, J. B., 52, 93
horizontal linking, 116

I
infeasibility, 280
internal consistency reliability, 170
interrater agreement, 368
invariant item ordering, 3
Isham, S. P., 33
item bank design, 271
item banking, 195
item banks, 292
item bias, 33
item exposure control, 271
item parameter drift, 33
item response theory
  adaptive testing, 259, 271
  automated test assembly, 237
  continuous response model, 333
  differential item functioning, 33, 345
  dimensionality, 99
  equating, 131
  graded response model, 116, 345
  item banking, 195
  item parameter estimation, 333
  linking, 116, 131
  nominal response model, 144
  nonparametric, 3
  parameter drift, 33
  parameter estimation, 89, 153
  person fit, 53
  polytomous item data, 99

J
joint maximum likelihood estimation, 70
Jones, D. H., 237

K
Kim, S.-H., 116, 131, 345
Kunce, C. S., 237

L
Li, H.-H., 99
likelihood ratio test, 345
Lindell, M. K., 368
linear programming, 259, 280, 292
LINKDIF, 392
linking, 116, 131
logistic regression, 357, 391
Lord's χ^2, 33
Luecht, R. M., 224

M
Mantel-Haenszel statistic, 33, 357, 391
Marcoulides, G. A., 85
mathematical programming, 212
maximizing reliability, 179
May, K., 93
Mazor, K. M., 357
McBride, J. R., 387
measures of association, 84
Meijer, R. R., 53
mode of test administration, 71
model of double monotonicity, 3
model of monotone homogeneity, 3
Mokken model, 3
monotone homogeneity, 3
multidimensional DIF, 357
multidimensionality, 357
MultiDOA, 393
MULTILOG, 131

N
Nandakumar, R., 99
Nering, M. L., 53
network-flow programming, 195, 237
Neuman, G., 71
nominal response model, 144
nonparametric item response theory, 3

O
optimal test assembly, 195, 212, 224, 237, 248, 259, 271, 280, 292
optimal test design, 195, 248

optimization, 224
ordinal person measurement, 3

P
paper-and-pencil tests, 71
parallel tests, 71
parameter estimation, 89, 153
parameter recovery, 153
person fit, 53
person response function, 53
ϕ coefficient, 84
Poly-DIMTEST, 99
polytomous item data, 99
polytomous responses, 248
pooled-within-classes correlation, 52
power, 170
pre-equating, 224
PWCOR, 52

R
Raykov, T., 369, 375
Reckase, M. D., 89
Reese, L. M., 259
relative error, 307
reliability, 170, 179
Rigdon, E. E., 85
Roberts, J. S., 70

S
sample size and reliability, 170
Sanders, P. F., 212
Sands, W. A., 387
Schumacker, R. E., 85
signed area, 33
significance levels, bootstrapped, 394
Sijtsma, K., 3
Silver, N. C., 52, 84
Soltysik, R. C., 393
speeded tests, 71
standard error of composite reliability, 369
standard error of measurement, 307
Stocking, M. L., 271
Stout, W., 99
strongly parallel tests, 212
structural equation modeling, 85, 369, 375
Swanson, L., 271

T
table of specifications, 307
τ equivalence, 71
τ-equivalent parts, 179
test assembly constraints, 292
test assembly, 259, 280, 292
test construction, 212, 224, 237, 292
test design, 280
test equivalence, 71
test information functions, 224
Timminga, E., 280
Type I error, 345

U
unsigned area, 33

V
van der Linden, W. J., 195, 259
variance components, 307
Verschoor, A. J., 212
vertical linking, 116

W
Waller, N. G., 391, 392
Wang, T., 179, 333
Waters, B. K., 387
weakly parallel tests, 212
Weinfurt, K. P., 394
Wightman, L. F., 292
Wollack, J. A., 144

Y
Yarnold, P. R., 393
Yu, F., 99

Z
Zeng, L., 333
0-1 linear programming, 195
